Education

PhD in Physics

UNIVERSIDAD AUTÓNOMA DE MADRID

- Measurement of photon plus jets production and identification of boosted top quarks in pp collisions at the LHC using the ATLAS detector
- Passed with *Cum Laude* mention

Madrid, Spain

February 2016

MSc in Theoretical Physics

UNIVERSIDAD AUTÓNOMA DE MADRID

Madrid, Spain

January 2011

BSc in Physics

UNIVERSIDAD AUTÓNOMA DE MADRID

Madrid, Spain

September 2008

- One academic year at the Humboldt-Universität in Berlin, Germany (2006-2007) with an *Erasmus Mundus* scholarship

Fellowships and contracts

Asistant Professor

NORTHERN ILLINOIS UNIVERSITY

DeKalb, USA

Since April 2023

Research associate

MICHIGAN STATE UNIVERSITY

East Lansing, USA

May 2016 - February 2023

Research contract

UNIVERSIDAD AUTÓNOMA DE MADRID

Madrid, Spain

August 2013 - April 2016

FPU fellowship of the Spanish Ministry of Education and Science

UNIVERSIDAD AUTÓNOMA DE MADRID

Madrid, Spain

August 2009 - August 2013

Internship in the summer student programme

DEUTSCHES ELEKTRONEN-SYNCHROTRON (DESY)

Hamburg, Germany

July 2007 - September 2007

Positions and appointments

Leadership positions

Coordinator

Analysis contact: $W' \rightarrow tb$ at 13 TeV

Convener

Analysis contact: γ +jets measurement at 8 TeV

Run coordinator

TDAQ PHASE II - PPES GROUP, ATLAS COLLABORATION

EXOTICS GROUP, ATLAS COLLABORATION

HQT SUBGROUP, ATLAS COLLABORATION

STANDARD MODEL GROUP, ATLAS COLLABORATION

LAR CALORIMETER GROUP, ATLAS COLLABORATION

Since Mar. 2023

Nov. 2018 - May 2023

Jan. 2019 - Mar. 2021

Sep. 2015 - Mar. 2017

Nov. 2011 - Jan. 2013

Editor and reviewer roles

Editorial board: Mono-top search at 13 TeV

Referee

Expert reviewer and sign-off, several searches

Editorial board: Right-handed neutrino at 13 TeV

Thesis committee member

Thesis committee member

Paper editor: $W' \rightarrow tb$ at 13 TeV preliminary results

Paper editor: γ +jets measurement at 8 TeV

EXOTICS GROUP, ATLAS COLLABORATION

JOURNAL OF HIGH ENERGY PHYSICS

ATLAS COLLABORATION

EXOTICS GROUP, ATLAS COLLABORATION

UNIVERSIDAD DE VALENCIA

UNIVERSIDAD AUTÓNOMA DE MADRID

EXOTICS GROUP, ATLAS COLLABORATION

STANDARD MODEL GROUP, ATLAS COLLABORATION

Since Aug. 2021

Since May 2021

Since April. 2021

Published Jan. 2023

Defended Jan. 2022

Defended Dec. 2021

Published Aug. 2021

Published Mar. 2017

Teaching, supervision and mentoring

Graduate student supervision: at MSU

Student mentoring

Physics and math mentoring and teaching

THREE STUDENTS GRADUATED BETWEEN 2020 AND 2022

WOMEN AND MINORITIES IN THE PHYSICAL SCIENCES, MSU

HIGH-SCHOOL AND UNDERGRADUATE LEVELS, PRIVATE TUITION

May 2016 - Feb. 2023

Summer 2021

Jan. 2006 - Dec. 2009

Other appointments in the ATLAS Collaboration

PPES Software coordinator	TDAQ GROUP	Since Oct. 2022
Derivation contact	EXOTICS GROUP	Since Oct. 2021
Heavy resonance combination liaison	HQT SUBGROUP	Since Sept. 2018
Monte Carlo production contact	EXOTICS AND UPGRADE PHYSICS GROUPS	Jan. 2017 - Jan. 2019
Production manager for upgrade samples	MC PRODUCTION GROUP	Jan. 2017 - April. 2018
Software on-call expert	LAR CALORIMETER GROUP	Aug. 2011 - Jan. 2013
Developer and maintainer of the Calibration Hits Method	EGAMMA GROUP	Feb. 2010 - Aug. 2011

International conferences and seminars

11th Large Hadron Collider Physics Conference (LHCP 2023)	Belgrade, Serbia
CONVENER OF THE BSM-1 (TeV-SCALE) SESSION	May 2023
14th Conference on the Intersections of Particle and Nuclear Physics (CIPANP 2022)	Lake Buena Vista, USA
CONVENER OF THE PHYSICS AT HIGH ENERGIES SESSIONS & PLENARY TALK (PHYSICS AT HIGH ENERGIES)	August 2022
40th International Conference on High Energy Physics (ICHEP 2020)	Virtual conference
SEARCH FOR NEW PHYSICS IN FINAL STATES WITH HEAVY-FLAVOUR QUARKS USING THE ATLAS DETECTOR	August 2020
US ATLAS Physics Workshop 2019	Amherst, USA
OVERVIEW OF THE EXOTICS SEARCH PROGRAM: PRESENT AND FUTURE	August 2019
39th International Conference on High Energy Physics (ICHEP 2018)	Seoul, South Korea
EXPECTED PERFORMANCE OF THE UPGRADED ATLAS EXPERIMENT FOR HL-LHC	July 2018
ATLAS Overview Week 2018	Tokyo, Japan
PHYSICS STUDIES FOR THE HL(HE)-LHC	June 2018
Deep Inelastic Scattering 2017 (DIS 2017)	Birmingham, United Kingdom
HIGH- E_T ISOLATED-PHOTON PLUS JETS PRODUCTION IN pp COLLISIONS AT $\sqrt{s} = 8$ TeV WITH THE ATLAS DETECTOR	April 2017
ATLAS TDAQ week 2016	Barcelona, Spain
IMPLEMENTING TRIGGER CLUSTERING ALGORITHMS FOR PHASE 2	September 2016
6th International Workshop on QCD at the LHC (QCD@LHC2015)	London, United Kingdom
MEASUREMENTS OF JET AND PHOTON PRODUCTION IN PP COLLISIONS WITH THE ATLAS DETECTOR	September 2015
Calorimetry for the High Energy Frontier 2013 (CHEF2013)	Paris, France
STATUS OF THE ATLAS LIQUID ARGON CALORIMETER AND ITS PERFORMANCE AFTER THREE YEARS OF LHC OPERATION	April 2013

Selected publications

ON A TOTAL OF 1019 RESEARCH PAPERS. FULL LIST CAN BE ACCESSED THROUGH THE ORCID LINK INCLUDED IN THE HEADER OF THIS DOCUMENT

1. Hector de la Torre and Trisha Farooque, *Looking beyond the Standard Model with Third Generation Quarks at the LHC*, Symmetry **14.3** (2022), ISSN: 2073-8994, URL: <https://www.mdpi.com/2073-8994/14/3/444>
2. 11. ATLAS Collaboration, *High- E_T isolated-photon plus jets production in pp collisions at $\sqrt{s} = 8$ TeV with the ATLAS detector*, Nucl. Phys. B **918** (2017) 257, arXiv: [1611.06586](https://arxiv.org/abs/1611.06586) [hep-ex]

Skills

Languages	Mother tongue Spanish, fluent English, basic French and German
Operative systems	Administrator level knowledge of Linux systems
Programming	Proficient with C, C++, Python, Octave, Shell scripting and \LaTeX
Atlas software	Extensive experience with Athena, including sample production, simulation and reconstruction
Other software	Root, RooFit, RooStats, MadGraph5_aMC@NLO, fastjet, Pandas, version control, Docker

Research experience

AS ASSISTANT PROFESSOR AT NORTHERN ILLINOIS UNIVERSITY

ATLAS Upgrade programme

Since 2023

- **Coordinator of the TDAQ Phase II Physics Performance and Event selection group (Since 2023):** Managing dedicated group within the ATLAS trigger community dedicated to coordinate and support performance studies for the upgrade of the trigger system for the High-Luminosity LHC (HL-LHC). Organized weekly meetings and dedicated discussions with the different trigger groups.
- **Ongoing studies on the Global trigger (Since 2023):** Conducting performance studies related to cluster and jet reconstruction at the trigger level with HL-LHC conditions as part of the effort to design the Global trigger. This new planned trigger system consists of a layer of incoming multiplexing nodes that feed into a layer of global event processors. With this structure the whole event is available on a single processor (one FPGA), decoupled from the LHC bunch-crossing rate. It will be able to run complex algorithms to maintain or improve the performance of the ATLAS trigger in the challenging environment of the HL-LHC.

Searches for new physics beyond the Standard Model

Since 2023

- **Ongoing monotop search (Since 2023):** Member of the editorial board. Search for new physics in final states composed of one top quark accompanied by missing transverse energy with interpretations in dark matter and Vector-like quarks (VLQ) models.
- **Ongoing $W' \rightarrow tb$ searches (Since 2023):** Leader and contact editor of current iteration of the search, looking for new heavy vector resonances decaying into a top quark and a bottom quark, using the complete run-2 dataset.
- **Ongoing heavy resonance combination (Since 2023):** Participating in the current effort of the statistical combination of 18 searches dedicated to heavy vector resonances. Liaison for the searches with top quarks in the final state, $W' \rightarrow tb$ and $Z' \rightarrow t\bar{t}$.

Previous research experience

AS RESEARCH ASSOCIATE AT MICHIGAN STATE UNIVERSITY AND GRADUATE STUDENT AT UNIVERSIDAD AUTÓNOMA DE MADRID

Simulation and processing of simulated samples for physics groups

2018-2023

- **Derivation production for the exotics group (2021-2023):** Responsible for the group's derivation framework. This framework is used to process the common Monte Carlo simulation ATLAS format into simplified formats, with less content and/or events, that are easier to work with for specific analyses. I also process and submit to the grid production system the derivation requests from the different teams in the group.
- **Monte carlo sample production for the exotics group (2018-2019):** In charge of collecting, validating and processing the Monte Carlo requests of the different analysis teams of the group.

ATLAS Upgrade programme

2017-2023

- **Completed studies on the Global trigger (2017-2023):** Participated in performance studies on cluster and jet reconstruction for the Global trigger in the context of the HL-LHC ATLAS upgrade programme. Coordinated the design of a dedicated software framework for global trigger performance studies.
- **Monte Carlo sample production for HL(HE)-LHC studies (2017-2019):** Designed and executed sample simulation strategy for physics and performance studies used for the six Technical Design Reports (TDR) published by ATLAS in 2017. These TDR compiled the plans for the HL-LHC upgrade of the ATLAS detector. The same set of samples was used to perform studies included in the Yellow report on the physics potential of the HL(HE)-LHC, a fundamental input for the update of the European strategy for particle physics finalised in 2020. Coordinated with relevant experts and analysers to ensure the samples were created according to specifications and took care of the production of the samples with the ATLAS grid production system.
- **Performance studies for Trigger and Data Acquisition TDR (2016-2017):** Led calorimeter performance studies for the global trigger and provided inputs for other members of the team using a custom-built analysis framework.

- **Completed $W' \rightarrow tb$ searches (2016-2021):** Leader and editor of the Preliminary results on the $W' \rightarrow tb \rightarrow qqbb$ channel published in 2021, significantly improving the sensitivity with respect to previous analyses from both ATLAS and CMS. Supervision of two students, graduated in 2021 and 2022 respectively. Main analyser of first 13 TeV iteration of $W' \rightarrow tb \rightarrow qqbb$ search, published in 2018. Led on statistical analysis, framework development and strategy design. Responsible for sample generation and truth-level studies for the same search and another on the complementary channel, $W' \rightarrow tb \rightarrow l\nu bb$. Combination of both searches published in 2019.
- **Completed $b\bar{b}Z' \rightarrow b\bar{b}b\bar{b}$ search (2019-2022):** Responsible for the definition and study of new signal samples using Madgraph and performed the truth-level analyses needed to determine the analysis strategy. This novel analysis published in 2022 was focused on vector-like resonances that couple exclusively to third generation quarks. Specially relevant in the context of models incorporating lepton flavour universality violation.
- **Convener of Heavy Quarks, Top and composite Higgs (HQT) subgroup (2019-2021):** Managed search subgroup, part of the exotics group, focused on physics beyond the SM with final states of third generation quarks. Coordinated 20 analyses with approximately 200 analysers under my care dealing with many resonance searches and the full ATLAS programme of VLQ analyses. Reviewed relevant talks, internal notes and papers. Organised meetings and dedicated discussions. Advised the exotics group conveners on overall group matters.
- **Completed $VLB \rightarrow bh(bb)$ search (2019-2021):** Participated as HQT convener in the full run-2 version of the analysis, with preliminary results published in 2021. Supervised the main analyser, a student, graduated the same year. The analysis took advantage of an innovative background estimation method to improve the sensitivity with respect to previous VLB searches in a challenging all-hadronic final-state.
- **Completed $Z' \rightarrow t\bar{t}$ search (2019-2020):** Participated as HQT convener in the all-hadronic, full run-2 version of the analysis, published in 2020. Worked closely with the team in the validation of the background estimation process, based on a functional form. First analysis to introduce deep neural network top-taggers in ATLAS.

Physics measurements of standard model processes

2013-2017

- Led new physics analysis effort in the Standard Model group for the photon + jets analysis at 8 TeV, published in 2017. Performed differential cross section measurements as a function of 15 different observables in events with one photon and up to three additional jets. First test of color coherence effects in photon + jets events in ATLAS.

Liquid argon (LAr) calorimeter operations

2011-2013

- **LAr run coordinator (2011-2013):** Led of the LAr operations team, managing a team of around 15 experts and shifters. The team ensured the smooth operation of LAr within the ATLAS detector during the whole 8 TeV data taking period. Point of contact between the LAr operations team and ATLAS management.
- **LAr software on-call (2011-2013):** Expert position available 24 hours a day to investigate and repair issues related to the LAr online software and back-end electronics
- **LAr online software developer (2011-2013):** Developed two tools running on the ATLAS online framework during data taking. One tool to investigate single event upsets in LAr front-end boards and a monitoring tool to check the LAr configuration at the beginning of each run.
